Why Mobily Business?

Mobily Business is proud to provide the latest ICT services within the Kingdom of Saudi Arabia, and proud of its interest in providing the Saudi business sector with the most advanced and sophisticated solutions.

Mobily Business offers its customers the best value on voice and data packages that are designed to meet their business communication needs, and also provides them with many packages and add-on services at competitive prices.

Mobily Business provides great coverage of wireless and fiber-optic network in KSA, in addition to one of the largest data centers system in the world, which have more tier certified constructed facilities than any other company in the region. Its technical infrastructure was awarded with the highest international awards, which built a base towards moving forward in the innovation path.

Mobily Business had brought world-class cloud-based solutions, that have been designed to cover the needs of all sized enterprises. We at Mobily Business believe that our core values of innovation, customer satisfaction, and integrity differentiate us from our competitors. Our focus is on developing and maintaining customer fulfillment via delivering high-quality services every day that outstand customers' expectations.

Evolution Journey

Mobily Business has one of the largest and most advanced portfolios of ICT solutions in the Kingdom; encompassing Voice, Data, Connectivity, and IT services.

This portfolio includes Data Center, Enterprise Cloud, Security, Managed Services, IoT and Infrastructure solutions. Mobily Business IT Services portfolio is the most reliable, robust, diverse and cost-effective option, which leverages its industry-leading data, network, superior connectivity and world-class infrastructure that includes:

- Uptime TM Institute Tier-II, Tier-III and Tier-IV certified data centers in both construction and gold operations sustainability spanning across the Kingdom's major cities. Thus, promising the highest level of availability, geographical redundancy, and physical network security as well.
- ISO/IEC 27001:2005 ISMS, CSA Star Certified, ISO14644 Class 8, Cisco® powered enterprise-grade cloud infrastructure offering fully scalable cloud solutions while guaranteeing resiliency, efficiency and availability that matches global standards.
- First operator to launch IoT platform in the Kingdom. The state-of-the-art managed connectivity platform powered by Cisco Jasper is addressing the core needs of IoT Business, while its flexible plans and automation engines monetize the business.
- Enterprise Cloud platform that is as practical as it is powerful. The platform is designed to run the most complex, mission-critical applications. The cloud is engineered with the performance, security, resilience and services to support customer's entire IT estate.

- Corporate account in Mobily Business ePortal.

Complaints Handling Procedures

Mobily Business is committed to its best to comply with article 24 of the Regulations on the Protection of Rights of ICT Services' Users and on the Terms of ICT Service Provision document that contains the following:

1. The service provider must establish a special department to receive, manage and address user complaints related to its services.
2. The user has the right to submit his complaint to the service provider within (60) days after the latest of:
 - a. the last occurrence of the incident giving rise to the complaint or (if the complaint relates to an invoice) the date of issuance of the relevant invoice, or
 - b. the date on which the user becomes aware of the incident or receives the invoice, if it becomes apparent that the user is not aware of the invoice or the occurred incident at the time.
3. A complaint to a service provider can be also submitted by a person for and on behalf of group of users provided that:
 - a. the complaint is based on the same material facts and legal basis;
 - b. the person submitting the complaint also submits proof of legal representation of the users concerned.
4. The service provider must handle complaints within a period not exceeding five (5) days from the date the user submits his complaint to the service provider.
5. The service provider should establish clear and detailed procedures for handling user complaints ensuring its treatment according to the period specified in paragraph (4) above of this Article, taking into account the following:

- a. The procedures for complaint handling by the service provider shall be in an electronic system, as all the procedures for complaint handling must be saved and documented.
- b. Submission of the complaint should be made available through all possible means, such as by calling, through personal attendance or other, electronic, means. The service provider cannot oblige the user to be limited to a single means for filing his complaint.
- c. Users should be provided with a reference number for their complaint.
- d. Information to the user must be provided by text message (SMS) or other electronic means, after the complaint's submission, on the expected period of time to address the complaint. If the expected period expires before the complaint is processed, users must be informed of the progress of their complaint and of the new period expected for closure, taking into account the total period specified in this document.
- e. The users must be provided with a written, clear and detailed response (by SMS or email) about the result of their complaint, and not just in summary terms such as "the complaint has been addressed".
6. The service provider must publicise the means through which it receives complaints and its processing procedures on its website and service provision outlets, clearly and prominently, in Arabic and English.
7. The service provider must suspend any claim towards the user for a disputed amount, whether the dispute is before the service provider or before the Commission, and not suspend or cancel the service for that objected amount, until the complaint transmitted to the service provider or escalated before the Commission has been processed completely, but this does not exempt the user from paying the non-disputed amount within the payment period specified in the invoice.

8. Users may escalate their complaints to the Commission, when a solution has not been reached with the service provider within (180) days from the date of the service provider's closing the complaint, or the expiry of the period specified in paragraph (4) of this Article. The Commission may exceed this period in cases in which it was found that there were objective reasons preventing the user from submitting his complaint to the Commission during that period.
9. The Commission may not accept investigating the complaint when there are valid reasons for this, for example:
 - a. If the subject of the complaint is outside the jurisdiction of the Commission.
 - b. If the subject of the complaint was previously decided upon, whether by the Commission or a competent judicial authority.
 - c. If the user has the same complaint, which is still pending before the Commission or a competent judicial authority.
 - d. If the user escalates his complaint after the expiry of the specified regular periods, other than in the case of allowed exceptions.
 - e. If the complaint is unrealistic, incomplete, or based on incorrect requests, or if it does not fulfil the conditions for its admission.
 - f. If it appears that the complaint includes any inappropriate language.
10. The Commission may request from the service provider or the user any data or documents regarding the complaint pending before it, and they must provide the Commission with what is requested within the periods specified by the Commission.
11. The Commission shall terminate complaints submitted to it within a period not exceeding (30) days from the date of their escalation, unless the nature

Representations and Warranties

* Either Party warrants and represents that:

(a) it has the full right and authority to enter into, execute, deliver and perform its obligations under this Contract and any Order

(b) it has secured all necessary consents, licenses, and other approvals as may be required to perform its obligations under this Contract and any Service Order (the "Required Rights")

(c) it will maintain the Required Rights and will, at its cost, exercise any renewal right thereunder, and will use reasonable commercial efforts to acquire extensions, additions or replacements as are necessary to cause the required rights to continue through the applicable Contract or Order term

(d) shall at all times recognize, adhere to and comply with all applicable laws and regulations including, without limitation, those of CITC.

*Except what is stated in the service contract or any applicable Order, all representations, conditions, warranties or other terms, whether express or implied, by statute or otherwise, including (without limitation) any implied terms as to condition, quality, performance or fitness for purpose of the service, are excluded to the fullest extent permitted by law.

* Customers and mobily relation shall, at all time, be governed by all laws and regulations of the Kingdom of Saudi Arabia including, without limitation, those of Communications and Information Technology Commission (CITC).

* All disputes arising out of or in connection with any agreement between the tow parties shall be finally decided by the courts of KSA.

* Customer should maintain updated contacts of his authorized person/s (AP) on Mobily system as Customer invoices, SMS are sent to AP defined contacts, and call center is accepting calls/emails from defined AP only.

*Customer waives his right to dispute any invoice not disputed within sixty (60) days from the date of the invoice.

Service Continuity and Fault Management

1. Mobily Business will repair any service failures as soon as they are discovered or are communicated to Mobily Business by the user, whichever comes earlier, and will ensure that no fees/charges are charged to the customer during the period of interruption and faults.
2. Mobily Business are responsible for the good functioning and timely repair of any elements of their network outside the user's premises, devices and equipment required for providing services, including any connections and equipment installed or provided by Mobily Business within the customer's premises, or pursuant to obligations they have accepted when agreeing with the customer.
Mobily Business shall bear maintenance and repair expenses related to any such elements, for any reason, also including the natural obsolescence of networks and devices.
3. Mobily Business, upon receiving a fault report by a customer, must send to the customer the following:
 - a. The report number registered on mobily business.
 - b. The estimated time needed to fix the fault.
 - c. The date and time of the visit to the site - if needed - taking into account the user's availability.
 - d. A verification number to ensure that the fault is fixed and to request that the user close the maintenance request.
 - e. A notification to the user after the fault fixes is completed.
4. mobily Business will inform customers in advance of any required maintenance or upgrade works, if such works are likely to disrupt service for the users or require entry into their premises.
5. Customers, before communicating with mobily business, have to verify the proper functioning of their connections and any equipment they are responsible for in their premises, with the exception of any connections and equipment installed or provided by mobily business within the customer's premises, or as part of the service provider's obligations when agreeing with the customers.

Customers Commitments

1. Customer should review and read carefully all related products and services terms and conditions .
2. Customers may not use the services, equipment, software or other products they receive from the service provider, allow their use or modify them in violation of any applicable regulations in the KSA or in violation of the terms and conditions of their service contract. Users shall be held liable for any such illegal use and its consequences.
3. Customer is responsible for the protection of his internal network from any irregular breach, insofar as this breach is due to his calls, or data traffic.
4. Customers must pay the deposit amount and any periodic and non-periodic amounts due to mobily in time as specified in the service contract.
5. Where the service provider offers the installation of peripherals or other communications equipment, users must allow persons authorized by the service provider to enter their premises or sites occupied or controlled by the user, and remain in such sites to the extent reasonably necessary for the following purposes:
 - a. Carrying out any required repair or inspection works for such equipment or software or for other tools associated with the provision of a particular service to the user;
 - b. The installation of any communications equipment and tools within the site, for the provision, withdrawal, removal, maintenance or replacement of the service to the user.
6. Customers must comply with the terms of any licenses accompanying any software used in the service provider's hardware and equipment, and respect any related intellectual property rights or any other third party rights associated with the provision of any services, or the installation or use of any equipment on the user's site (including telecommunication devices and equipment) throughout the period of service provision or of its availability to the user.
7. Customers shall be responsible for communications outgoing from their devices or other telecommunication equipment, and shall be responsible for its proper use, at their own cost, regardless of the identity of the person who made or accepted these communications. Users may submit a complaint against the charges for electronic communications that they believe have not taken place through their devices or other electronic communications equipment.

Settlements and Risk Controls

According to article 27 from the Regulations on the Protection of Rights of ICT Services' Users and on the Terms of ICT Service Provision document in case service provider failure to comply with the standards and was determined responsible by the Commission, according to the facts of the case before it:

- a. Providing a financial settlement for the service.
- b. Correcting a problem to remove its effect on the user.
- c. Correcting the cause of the problem that led to the settlement, to prevent its re-occurrence again to another user.
- d. Letting the service contract of the user to be canceled or transferred to another service provider without any obligation of the user

Services' Contract

Any service contract must include at least the following information:

a. User information:

The name of the enterprise and the commercial register number and date and city of issuance, or the identification number of the enterprise in case the commercial register is not available for cases exempted by the Ministry of Commerce or for non-commercial entities, The information of the authorized person with supporting documents attached, as specified by the Commission.

b. Information on the required service (number or numbers of service or account, type of service, package description if a description of the individual services covered is included).

c. Credit limit of the service required - (if any).

d. Date of the service contract.

e. Information on the service provider employee who concludes the contract on behalf of the service provider, with the employee acknowledging the access and verification of the user's original identity card, when requesting the service through the personal presence of the service provider's employee.

f. Details of the tariffs and charges required for the services, equipment and devices provided, distinguishing between periodic and any non-periodic charges, whether at the start or the end of the service.

g. Details of the services, products and their features that the service provider is obliged to provide, and the mechanisms in place for

the settlement amount if the service provider fails to meet the quality parameters approved by the Commission or stipulated in the service contract, if found.

h. Details of the terms and obligations of the user and the consequences of non-compliance.

i. Details on any discounts or offer/offers, including the period of their validity, and any terms or obligations that will apply to the user during, or after the end of, the discount.

j. Details of any limitations to the use of the services provided under the service contract, and any fees that will apply when exceeding such limitations.

k. The term of the service contract, and the conditions for its extension, whether automatic or at the request of the user.

l. Service billing dates in line with any Commission requirements.

m. Conditions for any service modification and termination.

n. The conditions under which the service provider has the right to suspend and terminate the service, in whole or in part.

o. Any available mechanisms, terms and conditions for the transfer of the user's balance between different types of services subscriptions provided by the same service provider.

p. Information on the service provider's:

1. complaint procedures, also including the contact details of the service provider's complaint department.

2. procedures for dispute escalation to the Commission.
